(54) MRI DEVICE

(57)Abstract:

PURPOSE: To enable the automatic setting of the correct gain of the signal reception system of an actual image pickup visual field size from the image pickup visual field size at the time of tuning and the correct gain of the signal reception system determined at this time.

CONSTITUTION: An arithmetic means 5 for calculating the correct gain of the signal reception system for the set visual field size varying from the visual field size at the time of tuning from the image pickup visual field size at the time of tuning and the correct gain of this time is provided and the calculated gain is set in an amplifier 10 of the signal reception system.

LEGAL STATUS

[Date of request for examination] 06.06.1994

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 2526468

[Date of registration] 14.06.1996

[Number of appeal against examiner's decision of rejection]
